Our office in Kharkiv, Ukraine

WHO WE ARE

Software Systems and Applications (SSA) is an outsourcing software development company that was founded in 2003 in Kharkiv, Ukraine.

We offer custom software and web solutions, software services, IT consulting and graphic design.

OUR AIM

Our mission is to provide high-quality, extremely good value software solutions through strong relationships with our customers.

Our goal is to be the best solutions partner for leading businesses around the world and to help customers achieve their business objectives by providing innovative and cutting-edge IT solutions and services. We want to be the best solutions partner today and in the future.

LOCATION

SSA is located in Kharkiv which is known as Ukrainian technological and scientific center. Kharkiv is the "Students Capital" of Ukraine. According to the government statistics, total number of IT-related institutions in Kharkiv is about 100 (about 300 IT-specialities). The main highlights of Kharkiv region of Ukraine are:

- Excellent talent pool
- Strong education system
- Low cultural barriers
- Competative labor costs
- Developed infrastructure
- Stable political environment
- Growing economy

If you want to find more about Ukraine and particularly about Kharkiv region please download a paper from our website <http://www.ssa-outsourcing.com/paper.pdf>

Quality Assurance

STAFF

The core of our company is a group of professional software developers. All of us have comprehensive knowledge and strong experience in Information Technologies and know what we are doing in depth.

SSA is young company not only because it was created in 2003 but also because all of our developers are younger 35 years old. This fact gives us the possibility to create open-minded, reliable and effective team which is ready to solve tasks of any complexity. All members of our staff have Masters Degree as well as wide experience in IT field that paves the road to the development of high technological and scientific applications. All mentioned advantages make us extremely competitive on IT market.

PROJECT MANAGEMENT AND QUALITY ASSURANCE

Our managers are responsible for:

- Team management (identification, forming, motivation)
- Creation of communication channels
- Implementation of standards for quality assurance and software development

Every member of the management team has at least 3 years experience working for well-known companies and has accomplished several projects for European and North American customers.

The main duties of our managers are:

- Communication Management
- Requirements management
- Project management
- Software Configuration Management
- Quality Management
- Quality Assurance
- Risk Management
